Certificate Course in C Programming

Academic Year: 2023-2024

Syllabus

Unit 1: Introduction to C Programming

- Overview of C language and its significance
- Setting up the development environment

Unit 2: Basic Concepts and Data Types

- Variables, constants, and data types in C
- Input and output functions in C

Unit 3: Control Structures

- Decision-making statements: if, if-else, nested if
- Looping statements: while, for, do-while

Unit 4: Functions and Modular Programming

- Defining and calling functions in C
- Passing arguments to functions

Unit 5: Arrays and Strings

- Declaring and initializing arrays
- Manipulating strings in C

Unit 6: Pointers and Dynamic Memory Allocation

- Understanding pointers and memory addresses
- Dynamic memory allocation using malloc () and free()

Unit 7: Structures and File Handling

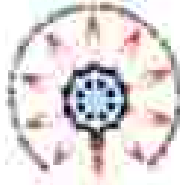

- Defining and accessing structures in C
- File input and output operations in C

Certificate Course on "Machine Learning"

COURSE OBJECTIVES

- To provide a comprehensive introduction to machine learning concepts and techniques.
- To develop practical skills in data preprocessing, analysis, and visualization.
- To master various supervised and unsupervised learning algorithms.
- To explore advanced machine learning techniques including neural networks and deep learning.
- To understand model training, optimization, and deployment for real-world applications.

COURSE OBJECTIVES

- Comprehensive understanding of machine learning fundamentals.
- Proficiency in data preprocessing, analysis, and visualization.
- Ability to implement and evaluate various machine learning algorithms.
- Skills to apply advanced machine learning techniques in real-world scenarios.
- Knowledge of model deployment and production best practices.

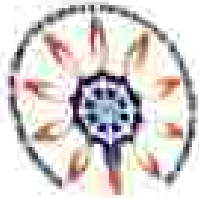

COURSE FEATURES

- Hands-on training with real-world datasets and projects.
- Experienced instructors with industry expertise.
- Access to comprehensive course materials and coding exercises.
- Interactive and engaging learning environment.
- Support for ongoing learning and problem-solving through forums and mentorship.

DURATION AND EVALUATION

- Duration - 20 hours.
- Classroom lectures and practical sessions.
- Evaluation will be based on MCQ and theoretical components.
- Theory Assessment: 25 marks.

Course Title: Certificate Course in Machine Learning

Academic Year: 2023-24

Introduction:

Welcome to the Certificate Course in Machine Learning, designed for students pursuing a Bachelor of Computer Science or a Bachelor of Computer Application. This short-term course aims to enhance your understanding and skills in Machine Learning over a concise duration. Sessions will be conducted from 2:30 P.M. to 3:30 P.M. during the academic year 2023-24.

About the Course:

About the Course	
Course duration	1 month - 30 hours
Fees	No fees
Timings	Monday to Saturday
Eligibility	2:30 P.M - 3:30 P.M.
Documents Required	12th Marksheet and Aadhar card
Rules and Regulations	75% attendance is compulsory to receive certificate

Course Outcomes

- Comprehensive understanding of machine learning fundamentals.
- Proficiency in data preprocessing, analysis, and visualization.
- Ability to implement and evaluate various machine learning algorithms.
- Skills to apply advanced machine learning techniques in real-world scenarios.
- Knowledge of model deployment and production best practices.

Expected Outcome

Upon completion of the course, participants will:

- Gain a solid foundation in machine learning concepts and techniques.

Certificate Course in Machine Learning

Academic Year: 2023-24

Syllabus

Unit 1: Introduction to Machine Learning

- Overview of Machine Learning
- Types of Machine Learning: Supervised, Unsupervised, and Reinforcement Learning
- Applications and Use Cases of Machine Learning
- Overview of Machine Learning Workflow

Unit 2: Data Preprocessing and Analysis

- Data Collection and Importing Datasets
- Data Cleaning and Handling Missing Data
- Data Transformation and Normalization
- Exploratory Data Analysis (EDA) and Visualization Techniques

Unit 3: Supervised Learning Algorithms

- Linear Regression and Multiple Linear Regression
- Logistic Regression
- Decision Trees and Random Forests
- Support Vector Machines (SVM)
- Model Evaluation Metrics: Accuracy, Precision, Recall, F1 Score

Unit 4: Unsupervised Learning Algorithms

- Clustering Algorithms: K-Means, Hierarchical Clustering
- Principal Component Analysis (PCA)
- Association Rule Learning: Apriori and Eclat Algorithms
- Anomaly Detection

Unit 5: Advanced Machine Learning Techniques

- Ensemble Methods: Bagging, Boosting, and Stacking
-  Models and Deep Learning Basics

Model Question Paper on Machine Learning

Time: 2 hours

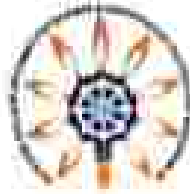

Total Marks: 25

Multiple Choice Questions (15 Marks)

- Which of the following is not a type of Machine Learning?
 - Supervised Learning
 - Unsupervised Learning
 - Reinforcement Learning
 - Integrated Learning
- Which of these is a common application of Machine Learning?
 - Email Spam Filtering
 - File Compression
 - Data Encryption
 - Network Routing
- What is the first step in the Machine Learning workflow?
 - Model Training
 - Data Preprocessing
 - Data Collection
 - Model Evaluation
- What technique is used to handle missing data in a dataset?
 - Data Wrangling
 - Data Cleaning
 - Data Augmentation
 - Data Transformation
- Which method is used to normalize data?
 - Min-Max Scaling
 - Data Binning
 - One-Hot Encoding
 - Tokenization

6. Exploratory Data Analysis (EDA) helps to:
- Create Models
 - Visualize and understand data patterns
 - Perform Data Aggregation
 - Clean Data
7. Which of the following is used for classification tasks?
- Linear Regression
 - Decision Trees
 - K-Means Clustering
 - PCA
8. What does the F1 Score measure?
- Model accuracy
 - Model precision
 - Balance between precision and recall
 - Model recall
9. Which algorithm is most appropriate for binary classification problems?
- K-Means
 - Linear Regression
 - Logistic Regression
 - PCA
10. What is the main objective of clustering algorithms?
- Predicting values
 - Grouping similar data points
 - Reducing dimensionality
 - Detecting anomalies

11. Which of the following is a dimensionality reduction technique?

- a) Apriori Algorithm
- b) K-Means Clustering
- c) Principal Component Analysis (PCA)
- d) Decision Trees

12. Anomaly detection is commonly used for:

- a) Image Classification
- b) Fraud Detection
- c) Sentiment Analysis
- d) Clustering

13. Bagging and boosting are types of:

- a) Clustering methods
- b) Ensemble methods
- c) Regularization techniques
- d) Feature scaling methods

14. Which neural network is primarily used for image recognition tasks?

- a) Recurrent Neural Network (RNN)
- b) Convolutional Neural Network (CNN)
- c) Deep Belief Network (DBN)
- d) Radial Basis Function Network (RBFN)

15. LSTM networks are best suited for:

- a) Static data analysis
- b) Image processing
- c) Time-series and sequence data
- d) Clustering
