The activity of the Career Counseling Cell

"Visit of Siddharth International School students to the Department of Computer Science"

The students of Siddharth International School had the opportunity to visit the Department of Computer Science at the Modern College of Computer Science and Information Technology. Such visits could be incredibly enriching for students, providing them with hands-on experiences and exposure to real-world applications of their studies. Observing practical demonstrations and interacting with professionals could spark curiosity and motivation among students, helping them connect theoretical knowledge with practical applications. Engaging with professionals and experts in the field during these visits could also inspire students to pursue careers in the IT sector. It allowed them to see the significance and impact of their studies in a broader context. Encouraging educational excursions and practical experiences like these could play a crucial role in shaping students' starts and aspirations. It was a positive step towards fostering a deeper understanding of science and creating a supportive learning environment.
